The latest episode in the fun physics-based platforming series. Tim is back! In the first chapter of the adventure Tim must undertake to save his grandfather, who now lives in an old fashioned tower. But has this tower been built by a god? If you like light platforming game play then you will like this game. This game gets better the higher you climb. If you want a challenge you can deal with this one. This game is hard and can be brutal at times. There is no way out so you must try. This game is great when you have a friend who you play with. 10 hours of gameplay Story Mode Sidequest Mode Meaningless ideas, statistics and trivia. You will have useless data because game don't give you any combat rate and kill rate. You will play the game for about 10 to 20 hours in vain and then you will post it... This game has a few things going for it, the story is great, it is about a silent guy that fights monsters and destroys the tower, looks very good, sounds nice, and has a great idea on how to attract the audience. But there are a few issues with this game that I have found. The battle system is no where near the complexity of a game like Monster Hunter where you use a weapon you have to practice for hours upon hours to get to a good point. There are some attacks that are meaningless, such as jumping off your platform and using a slice attack, because that would just be silly to do in a game with the time of limited combat. The story and characters are basically empty. Nothing is really explained and the monsters themselves don't add any kind of back story to the characters. The tower itself is very repetitive, the tower has no real interesting features and it is very easily beaten, you will discover all of the moves and they are not very good. Even with all of these issues, the game is fairly good in my opinion. The story is exciting and does a great job of attracting the audiences. The combat is something you would find in a fighting game and not a game that would promote its games core concept. The only reason you would want to play this game is for the story and not the combat. The combat is standard fare at this point in the genre. And finally, I can't believe how much progress this game has made in 11 years. I hope that Treyarch gets this

1.1 / 5.0 - iOS5.2/5.1.1 Took me about 5 minutes to figure out how to play. Game is so simple that you can find an object and quickly get the player the required resources. You can load objects by tapping them on the map. The game is quite repetitive. When you are driving on the roads you need to avoid collisions with other cars. You can't do that by using only the left button so you have to control it with the right button as well. Game lacks a meaningful character development. Player needs resources to survive in a harsh environment. You may also like: Hungry Forest 2019 Review Game crashes after playing for about 5 minutes and disappears from the App Store.
