When you edit RAW files in the RAW Editor, Lightroom Classic will automatically update the colors of your image. Use the slider to add or remove contrast, lighten or darken the colors, adjust the white balance, and make color changes. You can also access the RAW Editor from your desktop to edit your images. You can also download a camera profile for images from the camera using Lightroom Classic. You can also access the catalog on your memory card or hard drive to download and edit your existing image files. This version of Lightroom Mobile includes other new features:

Refine Details: In addition to changing Lightroom's default filter presets, you can apply any of the 19 Photoshop filters directly to your images. When you're ready to apply the filters, just tap the arrow on the right side of the filter's name in the top row to preview its effects. Then tap the arrow on the left side of the preview to apply it.

Duplicate Actions: Select a photo with duplicate actions and then duplicate them. Drag a duplicate action to a photo below the original action and apply the effects. Or simply drag the action below itself to reuse the previous

processing and save time. Magnify: Open a photo to a large, magnified view of your subject, then zoom in and out of it with a single click. Create a Program: Create your own custom presets in Lightroom. Save them in the sidebar, then select a photo and open it in one of the presets. This lets you customize a preset based on a specific image type or scene. 5ec8ef588b
