Yes. The serial number found on that diagram is the absolute most accurate serial number you could ever have. That is as close to the correct number as you are ever going to get. That is your serial number. Save it somewhere safe. Now, go home, sit back, relax, and wait for your parts. You need to find the correct serial number! Input the serial number you found on the parts diagram into the search engine. You will see the parts diagram you looked at and where the serial number was found. Make sure you copy that serial number and save it somewhere safe. You can now search by that serial number and find the parts diagram where the serial number was found. If you find that part number, then you can look up the part number on our Parts ID by Serial Number search engine. Find the correct parts diagram and you will be able to match your serial number with that parts diagram. Your parts diagrams should show the serial number, the model, the power, the displacement, etc. but it will be in some type of code or sequence. We will help you match your part number to the correct serial number. Your part number needs to match the serial number on the parts diagram you are looking for, but the serial number can be odd, complex, or very simple depending on the engine. It's a code! There are several different ways you might find a serial number on an engine. Sometimes you might be looking at a models diagram and see the serial number painted on the flywheel. Do you already have a serial number for your Mercruiser, Mercury, or MerCruiser engine? You will need to find the correct number. If you find the number, then you will need to locate the correct parts diagrams for your Mercury or MerCruiser engine. If you are at a loss as to which parts are for your Mercruiser or MerCruiser engine, then you can use the merc-marine.org Parts Search to search our Parts Search by Serial Number. The

Mercuriser Outdrive Identification By Serial Number

The Bravo One outdrive from 1978 through 1983 is identified by serial number M045955. The Bravo Two outdrive is identified by serial number M048119. The Bravo One was a direct-drive outdrive with chain-driven oil pumps. The Bravo Two was an oil-pump driven outdrive with a chain-driven oil pump.

The Bravo Two was built beginning in 1978 and continued to 1983. Part description: This part is a Mercuriser Bravo 2X Outdrive Parts. The Bravo One outdrive from 1978 through 1983 is identified by serial number M045955. The Bravo Two outdrive is identified by serial number M048119. The Bravo One was a direct-drive outdrive with chain-driven oil pumps. The Bravo Two was an oil-pump driven outdrive with a chain-driven oil pump. The Bravo Two was built beginning in 1978 and continued to 1983. Part description: This part is a Mercuriser Bravo 2X Outdrive. The Bravo One outdrive from 1978 through 1983 is identified by serial number M045955. The Bravo Two outdrive is identified by serial number M048119. The Bravo One was a direct-drive outdrive with chain-driven oil pumps. The Bravo Two was an oil-pump driven outdrive with a chain-driven oil pump. The Bravo Two was built beginning in 1978 and continued to 1983. OK, are you looking for the absolute, most correct, most precise serial number? You will need to input the number from the parts diagrams at the factory.

That is as close to the real number as you are going to get. It should be written somewhere on the parts diagram. Watch for the gray box with 'S' next to it. The S stands for serial number. If you don't see the S on a diagram, the parts diagram does not have that part number listed. When you find the parts diagram that has the S, then input the serial number. 5ec8ef588b
